

# Animal blood collection systems

Obtain the highest quality sample with a full range of collection styles, volumes and additives

## S-Monovette®

- Volumes from 1.1ml to 9.0ml
- Collection via vacuum or syringe technique
- Enables collection directly into a treated tube
- All plastic with screw cap closure
- Safety and non-safety needle versions available

## Multivette®

- 600µl maximum fill volume available in standard additives
- Gentle and hygienic collection via capillary action or venous pressure
- All plastic with screw cap closure
- Compatible with standard Luer needles

## Microvette®

- Volumes from 100µl to 500µl
- Capillary action and gravity flow options available
- Capillary straw contains additive, reducing premature clotting
- Ideal for the small volume needs of exotics

## Prepared Micro Tubes

- Reliable and economical transfer and transport
- Compatible with most in-house analyzers
- Convenient labeling
- Screw cap or push cap closure
